Keep your head down! Left arm straight! Knees bent. Rotate the hips! Feel the rhythm! No, no, no, you need to shift your weight from the back foot to the front foot at the start of your downswing! What kind of tempo is that? I said head down! The memories come flooding back as you stand over your ball. You've been honing your stroke, eating raw whey protein, and consuming 10,000 calories a day for months, just for this moment. Over 100 spectators stand on the 18th green snickering, heckling, yelling "noonan!"
